

Permit Appendix D: Site Specific Conditions

The following site specific conditions will be attached to the Permit as Appendix D.

The following site specific permit requirements apply to the authorized use and are the responsibility of the Holder, their guides and clients.

General Requirements

- No dogs or other pets are allowed on trips.

Emergency/Accident Notification Procedures

In the event of a life-threatening incident or fatality during a guided client trip, the holder's will report the incident to the Permit Administrator within 8 hours for front-country hikes and within 24 hours for wilderness backcountry trips. If the Permit Administrator is not reached in person then notify the listed contact for the district on which the incident occurs.

Compliance with Laws, Regulations, and Other Legal Requirements:

All existing and future regulations, policies and laws apply. This permit grants no exemptions or waivers and it is the Holder's responsibility to know and comply with applicable rules. This includes but is not limited to regulations and required permits related to Wilderness or other designated areas. It also applies to local fees such as the Northwest Forest Pass, campground or Sno-park fees. Holder's are responsible to check with the local District Office or relevant land management agency for currently applicable rules.

Leave No Trace Guidelines

Holders and guides must follow Leave No Trace Practices found at www.lnt.org.

Holder's and guides must dispose of human waste in vaults, pits and composting toilets where available. In backcountry areas, dig a "cathole" 4-6 inches deep in organic soil at least 200 ft from water, trails and campsites.

Bears

All guides will have read and understand the sanitation guidelines titled "Tips for Camping in Bear Country" (Attachment B) designed to minimize conflicts with all wildlife species. Such information will also be made available to clients.

**Appendix D: Land Temporary Permit Pool
Site Specific Conditions**

**Okanogan-Wenatchee NF
October 2011**

Unattended attractants (human foods, soft drinks and alcoholic beverages, cosmetics and toiletries, pet foods, processed livestock feed and grains, cooking residue, empty food containers, and other refuse) will be unavailable to wildlife by either storing in Interagency Grizzly Bear Committee tested and certified bear resistant containers, or by hanging 10 or more foot above ground level, 4 or more foot from the hanging structure, and 100 or more feet from sleeping areas. Attractants will be considered attended when non-sleeping people are within 80' of the attractants. All food preparation, cooking, and cleaning areas will be 100 or more feet from sleeping areas.
